

The Learning Community

PROFESSIONAL DEVELOPMENT SERVICES

The Learning Community is a professional development lab for educators who are passionate about teaching and learning. Our urban public school is open to teachers and administrators who want to see effective teaching strategies at work in real classrooms, share ideas with other committed educators, and see measurable gains in student achievement. We do not offer packaged programs or approaches. We listen to the needs of teachers and schools and design services to build their capacity. We work with individual teachers, coaches, grade-level teams or whole schools and districts.
